## LWIR 20 - 60mm 3X Continuous IR Zoom

Ideal for search and rescue or surveillance, the compact long wave Mithras 17 was developed for the new 17 $\mu$ m pixel cameras. Its ability to see through smoke and fine particulate dust make this small lens ideal for fire, police and military operations.

### Capabilities

- Obtain long wave infrared imagery, day or night
- Continuous zoom from 20mm to 60mm
- Long wave imagery allows visibility through smoke or fine dust particulate
- Quiet operation
- Compact size and weight
- Standard with Athena control card, GUI and protocol.
